Recently completed my bachelor's degree specialized in computer science and engineering. My academic journey was focused on building a strong foundation in programming languages such as python and web development, and I am enthusiastic about translating my theoretical knowledge into real-world applications.

POJECT

Chaton   July 2023-april 2024

Developed a secure and user-friendly frontend interface using a combination of HTML, CSS, Javascript and React to provide a intuitive chat experience. Architected and implemented the backend infrastructure using Node.js and API endpoints.

Snake game   June 2023

Snake is an action video game genre where the player controls a snake-like line that grows longer as it eats food. The player must guide the snake around obstacles without it colliding with itself or other objects, which becomes more difficult as the snake gets longer. The game ends when the snake hits a wall or its own tail.
